INTRODUCTION

Having 3.3 years of experience in developing and delivering software and innovative solutions to the projects. I leverage modern software engineering practices to efficiently address complex challenges and enhance organizational productivity. Additionally, I have collaborated with diverse teams to successfully complete projects.

PROFESSIONAL SUMMARY

- Progressive experience in Information Technology and has been involved in Development of enterprise software projects.
- Have extensive knowledge on Javascript, Typescript, Angular, AngularJS, PrimeNg, PrimeFlex, HTML, CSS.
- I have hands-on experience in digitization of various domains, including No Code Platforms, Chain of ORG level retail stores, Machine Critical Telecommunication Systems and Retail Technology / Jewelry

TECHNICAL SKILLS

Languages: JavaScript, Typescript, HTML, CSS

Frameworks & Libraries: Angular, Node.js, Prime Ng, Angular Material, RxJs, NgRx, React.js, Next.js, Redux, Tailwind CSS

Developer Tools & Platforms: NPM, Yarn, Git, GitHub, Jira, GCP, Visual Studio Code

Database Management: SQL, NoSQL (Fire Store), Big Query

Testing & API Tools: Cypress, Postman

EXPERIENCE

Software Development Engineer

Indiejewel Fashions Pvt Ltd (GIVA)

May 2024 – Present

Bengaluru

Projects:

GUTS: Giva Unified Transactional System

May 2024 - present

Industry: Retail Technology / Jewelry

Tech Stack: Angular, Angular Material, Firebase, Typescript, Javascript, Html, Css.

- Contributed to GUTS, GIVA's internal enterprise platform built to streamline and manage end-to-end transactions of metals like gold and silver.
- Improved transaction system workflows through targeted feature enhancements, increasing task completion efficiency by 25%.
- Enabled smooth coordination across cross-functional departments by integrating communication and approval pipelines during critical commodity transactions.

GIVA API:

May 2024 – Feb 2025

Industry: Retail Technology / Jewelry

Tech Stack: Express.js, Node.js, Firebase, BigQuery

- Developed and optimized RESTful APIs for finance-related operations using Node.js and Google BigQuery, improving data retrieval performance and reliability.
- Integrated Firebase Authentication to ensure secure user access, streamline identity management, and enhance platform security.

GIVA MTO:

Feb 2025 – present

Industry: Ecommerce

Tech Stack: React.js, Next.js, Html, Css, Tailwind Css

- Designed and developed a complete Made to Order (MTO) e-commerce website for GIVA, enabling customers to seamlessly browse and purchase personalized jewelry exclusively available under the MTO category.
- Implemented responsive UI components using React, Nextjs, and TailwindCSS to ensure a smooth and

intuitive user experience across devices.

Software Development Engineer I

February 2024 – April 2024

Techaffinity Consulting Pvt Ltd

Bengaluru

- Completed internal training and self-driven learning in Node.js, Express.js, and backend development fundamentals.
- Practiced building and testing RESTful APIs using Postman and Cypress, simulating real-world workflows.
- Explored concepts of authentication, middleware, and database operations with Firebase.

Associate Software Engineer

February 2022 – February 2024

Isteer Technologies Pvt Ltd

Bengaluru

Projects:

Appsteer:

Feb 2022 – Nov 2022 & Sept 2023 – Feb 2024

Industry: No code platform

Tech Stack: Angular, Typescript, Javascript, PrimeNg, PrimeFlex, RxJs, NgRx, Html, Css

- Developed and maintained scalable, enterprise-level modules for Appsteer's no-code platform using Angular and related frontend technologies.
- Built dynamic and responsive UI components with PrimeNG, enhancing user interactivity and visual consistency across the application.
- Utilized RxJS and NgRx for managing complex state and asynchronous data flows, improving application performance and code maintainability.
- Collaborated closely with backend developers, product managers, and QA engineers in an Agile/Scrum environment to deliver features on schedule.
- Participated in regular code reviews and sprint planning meetings, contributing to a culture of continuous improvement and high code quality.

LMS: Lead Management System

March 2022 – Nov 2022

Industry: Chain of ORG level retail stores

Tech Stack: AngularJs, Javascript, Cube.js, Html, Css

- Designed and implemented Area Manager role-based access controls, enhancing user-specific workflows and improving operational efficiency by over 50%.
- Built a dynamic and data-driven dashboard using CubeJS, enabling real-time visualization and actionable insights for sales and operations teams.
- Provided ongoing maintenance, bug fixing, and feature enhancements to ensure system stability and scalability as part of the core LMS support team.
- Collaborated with cross-functional teams, including product managers and backend developers, to streamline the lead tracking process across regions.

CAT: Corporate Administration Tool

Dec 2022 – Aug 2023

Industry: Machine Critical Telecommunication Systems

Tech Stack: AngularJs, Angular, Typescript, Javascript, RxJs, NgRx, Html, Css

- Provided ongoing support and maintenance for the Corporate Administration Tool (CAT), a critical internal application used to manage corporate subscriber contacts and group configurations for Kodiak's Push-to-Talk (PTT) services.
- Ensured high availability and reliability of CAT for major global telecom clients including AT&T, Verizon, and Vodafone, contributing to seamless communication across enterprise networks.
- Collaborated with cross-functional teams to resolve system issues, implement feature enhancements, and improve overall user experience and administrative efficiency.

EDUCATION

BVCITS Affiliated with JNTUK (Jawaharlal Nehru Technological University, Kakinada)

Bachelor of Technology in Electronics and Communications

May 2015 – April 2018
